

Virtual room: equipment for web conference

The Virtual Room video-conferencing equipment allows for a professional setting for online meetings, e.g., for job or media interviews. The equipment is set up in the silent pool office (STW B 5.2). With the Virtual Room video-conferencing technology only the speaker is on-site, all the other participants are connected virtually.

The equipment includes two photo lamps *1, a headset *2 for the best possible sound quality, a camera *3 for the best possible video quality and a green screen *4 for optimal background changes.

Please leave the setting as you would like to find it.

Instructions

Logitech Rally Camera

1. Plug the power adapter into an outlet.
2. Connect the USB cable to your laptop.
3. The camera starts automatically and moves its head to the “home” position.
4. You can use the remote to move the camera head to your preferred position.
Caution: Manually rotating the camera head may damage the device.
5. To start a video conference, start your application of choice and select the Logitech Camera.

Headset Jabra Evolve2 85

The headset is connected to your laptop via Bluetooth.

1. Press and hold the Bluetooth button until it blinks blue.
2. Go to your Bluetooth settings and add “Jabra Evolve2 85”.

Green screen

To set up the green screen, simply flip open the aluminium case and lift the handle to a suitable height. The frame automatically locks the canvas in place.

Please store the green screen in the case when it is not in use (see picture).
