

## Technical possibilities – Virtual Room

as part of an event taking place at the Collegium Helveticum / STW Observatory

### Video-Conference (in the Virtual Room)

With the Virtual Room video-conferencing technology only the speaker is on-site, all other participants are connected virtually. It ensures a professional setting, e.g., for a job interview.

The equipment comprises of two photo-lamps \*4, a headset \*5 for the best possible sound quality, and a green-screen \*6 for optimized background modification—the latter is provided upon request. The setting can be installed in your office or any other room.

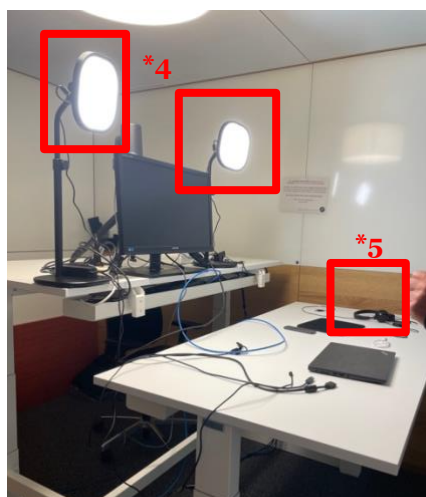

Fig. 1 and 2: Example of the setting (table is not included) for a video conference of only one person on-site (more professional setting for a video conference, e.g., for a job interview etc.).

Fig. 3 and 4: Left is the result of the green screen = optimal background change. Right is the green screen.
