

## WLAN/Wi-Fi at the Collegium

### Connecting to the Wi-Fi as an ETH-Guest or employee with an ETH user account:

To connect to the Wi-Fi at the Collegium you first need a [ETH user account](#).<sup>1</sup>

With your ETH-User Account you can either join the **eth**, **eth-5** or **eth-6 Wi-Fi** or continue using **eduroam**.

Instructions on how to login can be found here: [How to connect – ITS Services for D-GESS](#)

**All Wi-Fi Networks** listed above connect with the same personalized login:

Username: <ETH username>**@staff-net.ethz.ch**

Password: ETH network password

### Connecting to the Wi-Fi as a Visitor/Guest without an ETH user account:

As a visitor/guest without ETH User Account you can try using the eduroam login from your home university. As the ETH-IT Team has no control of these network logs they cannot help if your login fails.

Alternatively, you can use the **ETH-visitors Wi-Fi** which is a public Wi-Fi and as such isn't encrypted.

Instructions on how to login can be found here: [ETH-Visitors - IT Knowledge Base - Confluence](#)

Further information can be found here: [Further information about WLAN \(Wi-Fi\) - IT Knowledge Base - Confluence](#)

---

<sup>1</sup> In general, all ETH guests and employees have an ETH user account. If you have problems with the login, please contact our [IT support](#):
